DARQUER

CALAIS · 1840

Official press release

DARQUER secures its future thanks to a Calais driven revival!

Calais, November 16, 2026

An iconic lace manufacturer since 1840, DARQUER has faced numerous challenges over the past twenty years, ultimately bringing the company to the brink of closure in the summer of 2026.

Thanks to a local initiative led by an internationally recognized lace expert, the company's key assets were acquired on November 16, 2026, with the objective of preserving a unique industrial heritage, reviving production activities, and establishing a sustainable new phase of growth for Calais lace.

We are pleased to inform all stakeholders connected to DARQUER that our company is fully operational with immediate effect, enabling us to continue serving our most loyal customers and to actively regain our market position.

To achieve this ambition, DARQUER benefits from a strategic industrial partnership with its fellow Calais-based company, BOOT & COSETEX, which shares the same industrial site in the heart of Calais.

DARQUER CALAIS 1840 has a history, we will give it a new future.
